DIVING GUIDELINES IN MALDIVES

The maximum depth for diving in the Maldives is 30 meters. Your allowed diving depth will depend on your certification level and experience. Before your trip, ensure your insurance policy covers you for your planned diving activities. Strong and unpredictable currents are common, especially during new and full moons, so be prepared. We recommend you hold certification for diving up to 30 meters and feel confident with drift diving. Please note that decompression diving, solo diving, and technical diving are strictly prohibited.

All guests must have an Open Water Diver certification or an equivalent qualification. Some dive sites feature recommended depths below 18 meters, so Advanced or Deep Diver training is advised. Please review the specific itinerary for any minimum dive requirements or additional details before your arrival.

You are responsible for your safety and dive using a personal dive computer. You must dive with a dive buddy. If you are a single diver, a buddy will be allocated on board. There will be no diving on arrival and departure days. All divers must leave at least 24 hours between their last dive and their flight departure.

We provide **Nitrox** facilities with additional charges, with Nitrox fills (typically 32%). To ensure your tank is ready for diving, please notify the dive guide well in advance.

Courses: We can provide Advanced Open Water Course and Nitrox courses on board. Their availability depends on the itinerary and must be arranged in advance before your arrival.

Itineraries: All itineraries and dive sites are subject to various unpredictable changes including weather conditions and changes in Maldivian Government approval. Whilst Spirit Liveaboards makes every effort, we cannot guarantee diving at specific sites. In adverse weather conditions, the guides and captain of the boat will make the final decision about which dive sites to visit to ensure that the guests, staff, and boat safety is not compromised in any way. Suppose in the unfortunate event that dives are missed, or dive sites are not reached due to weather conditions or other unforeseeable changes. In that case, Spirit Liveaboards will not offer a refund or compensation.

Our dive program averages up to 17 dives on a 7-night trip, 23 dives on a 9-night trip, 26 dives on a 10-night trip, 30 to 32 dives on a 12-night trip, 36 to 38 dives on a 14-night trip.

Dive Support Boat: A 60ft (20m) spacious and well-equipped dive “dhoni” ensures seamless dive operations, providing ample space for gear storage and preparation to navigate and explore the pristine and less-traveled regions of the Maldives.

Rental Equipment: High-quality diving equipment is available for rent, ensuring you have everything you need for a comfortable and safe diving experience.

We ask that you request your equipment before you arrive on board. We need to know normal sizes, height, weight and shoe sizes to prepare the correctly sized equipment for you. The diving dhoni have ample storage space for your equipment and there is a spare box on board.

We suggest that you bring the following:

Mask, snorkel, fins, boots, wetsuit, regulator, BCD, SMB (with a minimum of 5 meters of line to deploy during the safety stop), a dive computer and torch (with spare batteries), and a reef hook if you have one.

The average water temperature is 29°C and we recommend a 3/5mm shortie or wetsuit.

All divers are required to use a dive computer, SMB, reef hooks for every dive, and a torch for each night dive. There are no night dives on Deep South itineraries.
